国家智能交通 (ITS) 行动计划 引领行业发展

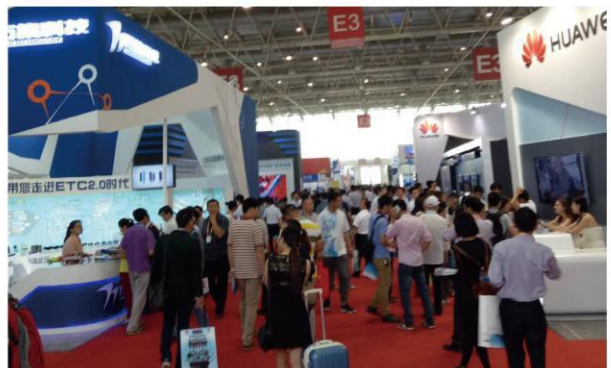

National Intelligent Transport Systems (ITS) Action Plan Leads the Industrial Development

国家发改委和交通部联合印发《推进“互联网+”便捷交通促进智能交通发展的实施方案》，明确了国家新一代ITS的发展框架、服务内容和产业重点，该方案被誉为“国家智能交通 (ITS) 行动计划”，是国家层面第一次出台关于智能交通发展的实施方案，对我国ITS发展具有重大意义。“十三五”期间，针对“一带一路”、“京津冀协同发展”、“长江经济带”等国家战略对智能交通提出了重大需求，在新技术、新需求的大背景下，智能交通系统的发展将进入一个新的时代。

The Implementing Proposal for Promoting "Internet Plus" Convenient Transportation to Advance the Development of Intelligent Transportation jointly issued by the National Development and Reform Commission and the Ministry of Transport specifies the new generation of ITS' development framework, services and industrial emphases in China, known as "National Intelligent Transport (ITS) Action Plan". This is the first implementing proposal on intelligent transportation introduced at national level, being of significance to China's ITS development. During the "13th Five-year Plan" period, implementation of "The Belt and Road Initiative", "Coordinated Development of the Beijing-Tianjin-Hebei Region", "Yangtze River Economic Zone" and other national strategies is in great need of ITS, which as will set into a new development stage in the context of new technologies and demands.

智能交通系统 (ITS) 提出20多年以来，在全世界取得了长足发展，车载导航、交通信息服务、不停车收费 (ETC)、智能公交服务、城市智能化交通管理等应用已经普及并形成了产业。近几年，随着我国社会和经济的发展、随着交通基础设施的完善，百姓出行的需求和模式发生了很大变化。与此同时，新一代信息技术给ITS的发展提供了新的能力，而提高交通运输服务水平和运行效率、提升载运工具智能化水平、创造新型交通运输产业等又给ITS提供了新的发展空间。

ITS has made considerable progress since it was presented 20 years ago, where vehicle-mounted navigation, traffic information service, electronic toll collection (ETC), intelligent public transportation service, urban intelligent traffic management and other applications have been widely used, and arrived at the industry scale. In recent years, people's demands for travel have changed a lot as China makes great headway socially and economically with significant improvement in transportation infrastructure. The new generation of information technology provides new capabilities for the development of ITS, while improvement in transportation service level and operational efficiency and intelligence level of conveyance as well creation of new-type transportation industries and others provide ITS with new development space.

全球智能交通市场预计从2016年的480.3亿美元增至2020年的1172亿美元。交通管理系统将占市场最大份额，期间年复合增率达19.3%。

全球日益增多的人口带来了飞速发展的城市化，而交通拥挤和安全等问题也随之出现。对于解决这些问题的可持续解决方案的需求非常迫切。基于云的技术兴起，以及车对车 (V2V)、车对电网基础设施 (V2I) 的技术进步正在使智能交通变为现实。

到2020年，北美预计继续成为全球市场的领导者，占市场最大份额。由于不断增长的人口和对智能系统的更大需求，亚太地区正在兴起，预计到2020年将超越欧洲。
